

Factsheet

SMART Board™ 600i interactive whiteboard system

Continuous teaching

Integrating technology into the classroom doesn't have to be complicated. With the SMART Board™ 600i interactive whiteboard system, teachers can focus on engaging their students rather than wrestling with a multitude of hardware. The 600i incorporates a Unifi™ 35 projector, speakers and a SMART Board interactive whiteboard, and its integrated components allow teachers to choose and manage all their digital tools. The system comes with all the interactive features, quality, training and best-in-class software that you've come to expect from any SMART product.

Creative learning

With the 600i, it's easy to incorporate student-directed movies, Web journals and virtual field trips into the curriculum. One button starts up a complete creativity center that will make learning a dynamic experience for all students. To use VCRs, DVD players, digital cameras, laptops and other audiovisual equipment with the system, teachers can just plug them into the extended connection panel. Teachers are able to switch between them directly from the interactive whiteboard screen without using a remote control.

Fit for the classroom

The 600i requires little technical support – it's easy to purchase and install, and the integrated elements make it easy to manage the system. The wall-mounted projector reduces shadows on the screen and prevents light from shining in teachers' eyes. Virtually any classroom can accommodate the 600i because the projector is located directly above the interactive whiteboard, so there's no need for complicated wiring or ceiling mounting. The projector only has to be configured once after installation. The components are permanently installed, and theft is much less likely to occur because the projector is inoperable if removed from the rest of the system. With the first-class 600i interactive whiteboard system, teachers can put their class first.

Touch the interactive whiteboard to control computer applications, and write in digital ink over any application. The wall-mounted projector reduces distracting shadows for you and your students.

Dimensions

Active screen size

Model **area (diagonal)**

SB660i 64" (162.6 cm)

SB680i 77" (195.6 cm)

Features

- 1 Unifi projector
- 2 Audio system
- 3 Touch-sensitive surface
- 4 Extended connection panel
- 5 Control module
- 6 Eraser and pens

Key features

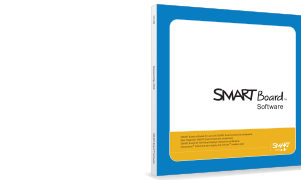

- **SMART Board interactive whiteboard** – The touch-sensitive display connects to your computer and Unifi projector to show your computer image. You can then control computer applications directly from the display, write notes in digital ink and save your work to share later. The SMART Board interactive whiteboard comes with feature-rich SMART Board software.
- **Unifi projector** – An integrated XGA (1024 x 768) projector featuring Vikuiti™ super close projection. A locking mount secures it in place.
- **Audio system** – Two, 20-watt, stereo-amplified speakers are controlled from the pen tray.
- **Control module** – Launch the Unifi projector On-Screen Interface, and control projector power and volume from the pen tray.
- **Unifi On-Screen Interface** – Select projector sources, adjust projector settings and access help screens, all from the SMART Board interactive whiteboard.
- **Extended connection panel** – Easily connect a computer, VCR, document camera, DVD player or other peripherals.
- **Write over any source** – Pick up a pen and write over any source, including video, and capture to a USB storage device.
- **Closed projector engine** – The Unifi 35 projector uses DLP® technology and does not require cleaning or filter replacement.
- **Warranty** – Two-year warranty on Unifi projector, 90-day or 500-hour warranty on lamp. SMART Board interactive whiteboard warranty is five years upon product registration, two years standard.

Height-adjustable wall mount

- **Height-adjustable wall mount** – Raise or lower the interactive whiteboard to set the desired height. Make smooth adjustments even with one hand. Now available for both the 680i and 660i systems.

Features

- Installs easily
- Adjusts by 20" (50 cm)
- Locks the entire system at its highest position

SMART Board software

Ever wonder what makes SMART Board interactive whiteboards so powerful? Meet SMART Board software – the real genius behind the world's number one interactive whiteboard.

Notebook™ software

- Create dynamic lessons using Notebook software's Gallery of thousands of vibrant, curriculum-relevant images, video files and lesson activities
- Add hyperlinks to images, shapes and text to jump to websites, multimedia files or other Notebook pages
- Use superscript and subscript characters, scientific symbols and Adobe® Flash® extras in your science and math lessons
- View and arrange Notebook pages in a variety of ways. Use the Dual Page Display to see two pages at once, or drag and drop pages as you wish
- Use colorful pens to write over your lessons, then convert handwriting to text with the press of a button
- Save files in various formats (e.g., PDF, HTML) or as separate image files (e.g., JPEG, PNG, GIF), and e-mail them to students for review

Ink Aware

- Write and save notes in many third-party applications, including Microsoft® Word, Power Point® and Excel® software

SMART Board Tools

- Write over moving or paused video, or record all screen activity as a video
- Type with the On-Screen Keyboard
- Focus attention with the resizable Spotlight tool, or use the Screen Shade to reveal your information step by step

LinQ™ software

- Connect quickly between devices. Use your laptop to project onto and control applications or the interactive whiteboard (and vice versa).

Software system requirements

- Supports Windows®, Mac OS and Linux® operating systems
